

A/B compartment asymmetry of gene-body mCH change in BAP1-KO

mCH change by A/B compartment

Wilcoxon A vs B: $p < 2.2e-16$ Pairwise Wilcoxon, BH adjusted: A to B vs B to A: $p = 1.85e-01$ | Stable vs B to A: $p = 5.88e-05$ | Stable vs A to B: $p = 4.28e-05$

mCH change by compartment shift

mCH direction by compartment and compartment shift

Significant genes only (FDR < 0.05), $n = 5,544$

mCH direction ■ Hypermethylated ■ Hypomethylated
