

mCH Change vs MeCP2 Fold Change

All genes with MeCP2 data: Spearman $\rho = 0.085$, $p = 7.65e-29$, $n = 17,096$ | mCH-significant subset: $\rho = 0.177$, $p = 1.10e-37$, $n = 5,146$

mCH direction ● Hypermethylated ● Hypomethylated ● Not Significant
