

Dose-response between K119ub level and neuronal gene identity

Neuronal gene fraction across control K119ub signal deciles

Spearman rho = 0.527 (p = 1.17e-01) | trend chi-squared = 43.2 (p = 5.05e-11) | dashed line = universe fraction 22.2%

Neuronal enrichment odds ratio per decile against the other nine

● Not Significant ● Significant
