

Cross-modality correlation on log2 fold change scales

mCH vs CG 5-methylcytosine

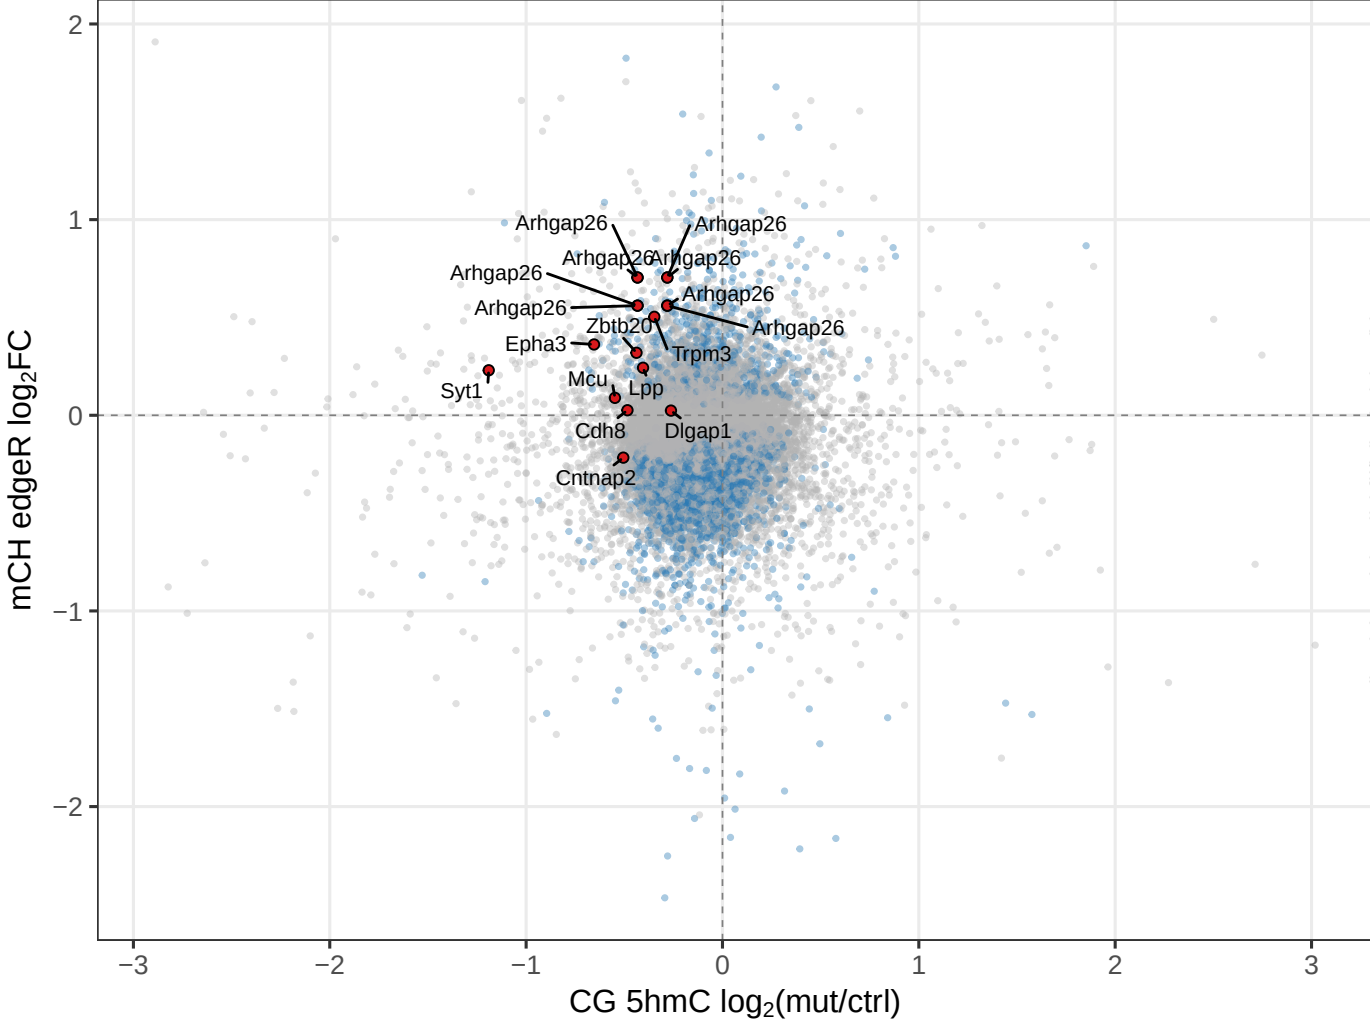

Spearman rho = 0.109 [NA, NA], n = 20,848

• mCH Significant • Not Significant

mCH vs CG 5-hydroxymethylcytosine

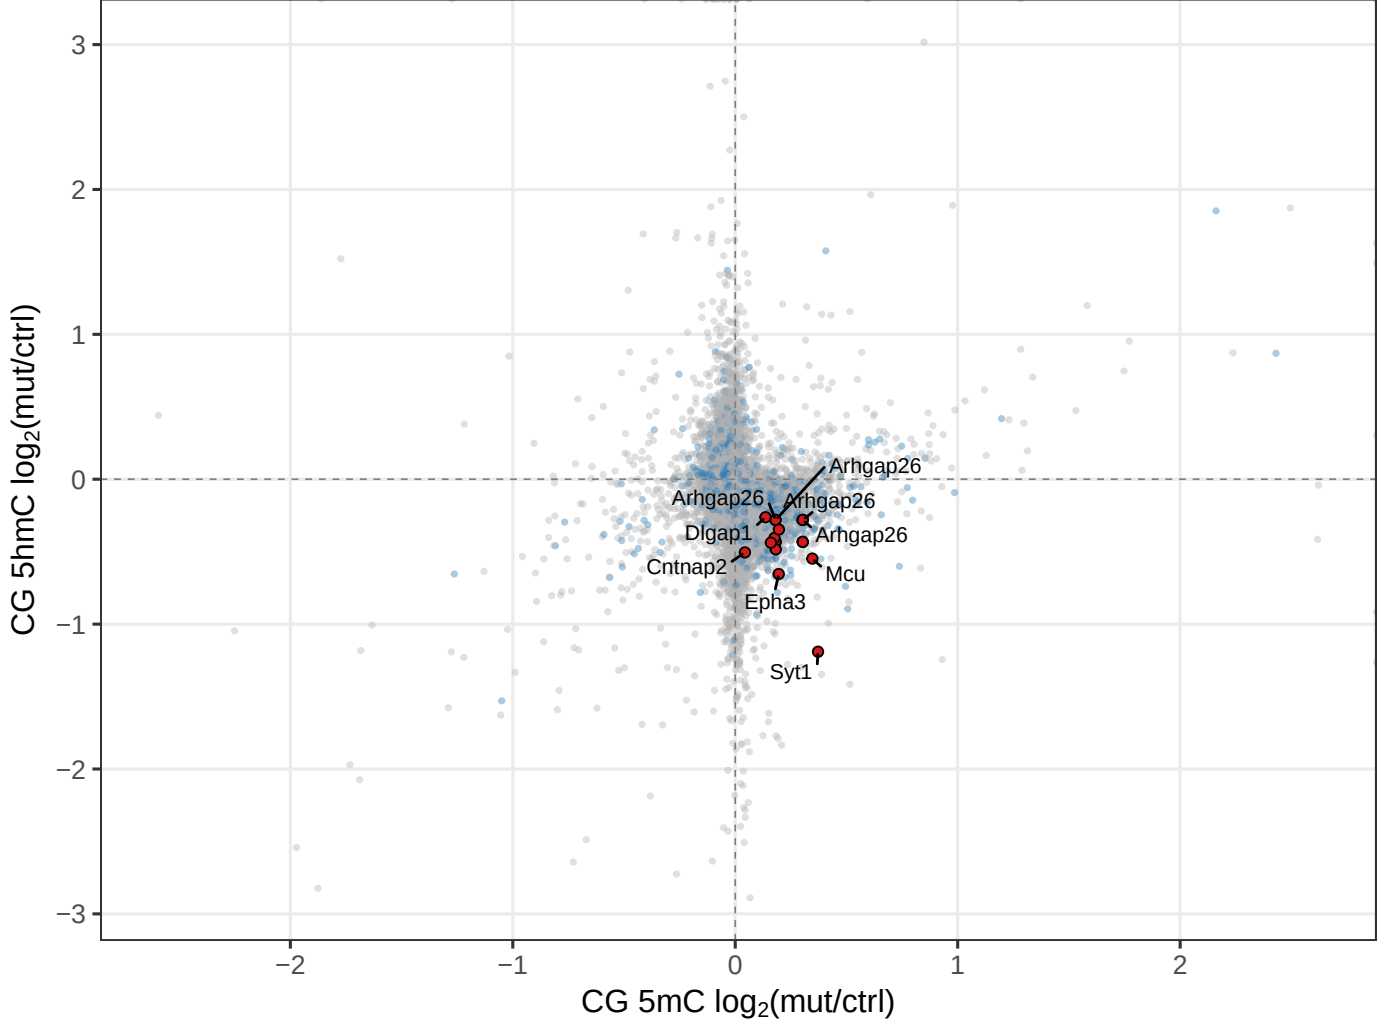

Spearman rho = 0.072 [NA, NA], n = 20,848

• mCH Significant • Not Significant

CG 5mC vs CG 5hmC (reciprocal pattern)

Spearman rho = -0.478 [NA, NA], n = 20,848

• mCH Significant • Not Significant
