

H2AK119ub against gene-body mCH change

Spearman rho = 0.261, $p < 2.2e-16$ | n = 17,535 genes with quantifiable H2AK119ub bigwig signal

mCH ● Significant ● Not Significant

Axes clipped at the 99.5th percentile of the absolute value; 154 genes fall outside the panel and still count in the quadrant totals.
