

Non-CG methylation vs MeCP2 (gene-level)

n (total) = 6351 genes | n (sig in both) = 796 genes

Spearman rho = 0.38 | p = <1e-10

● Not significant ● Significant

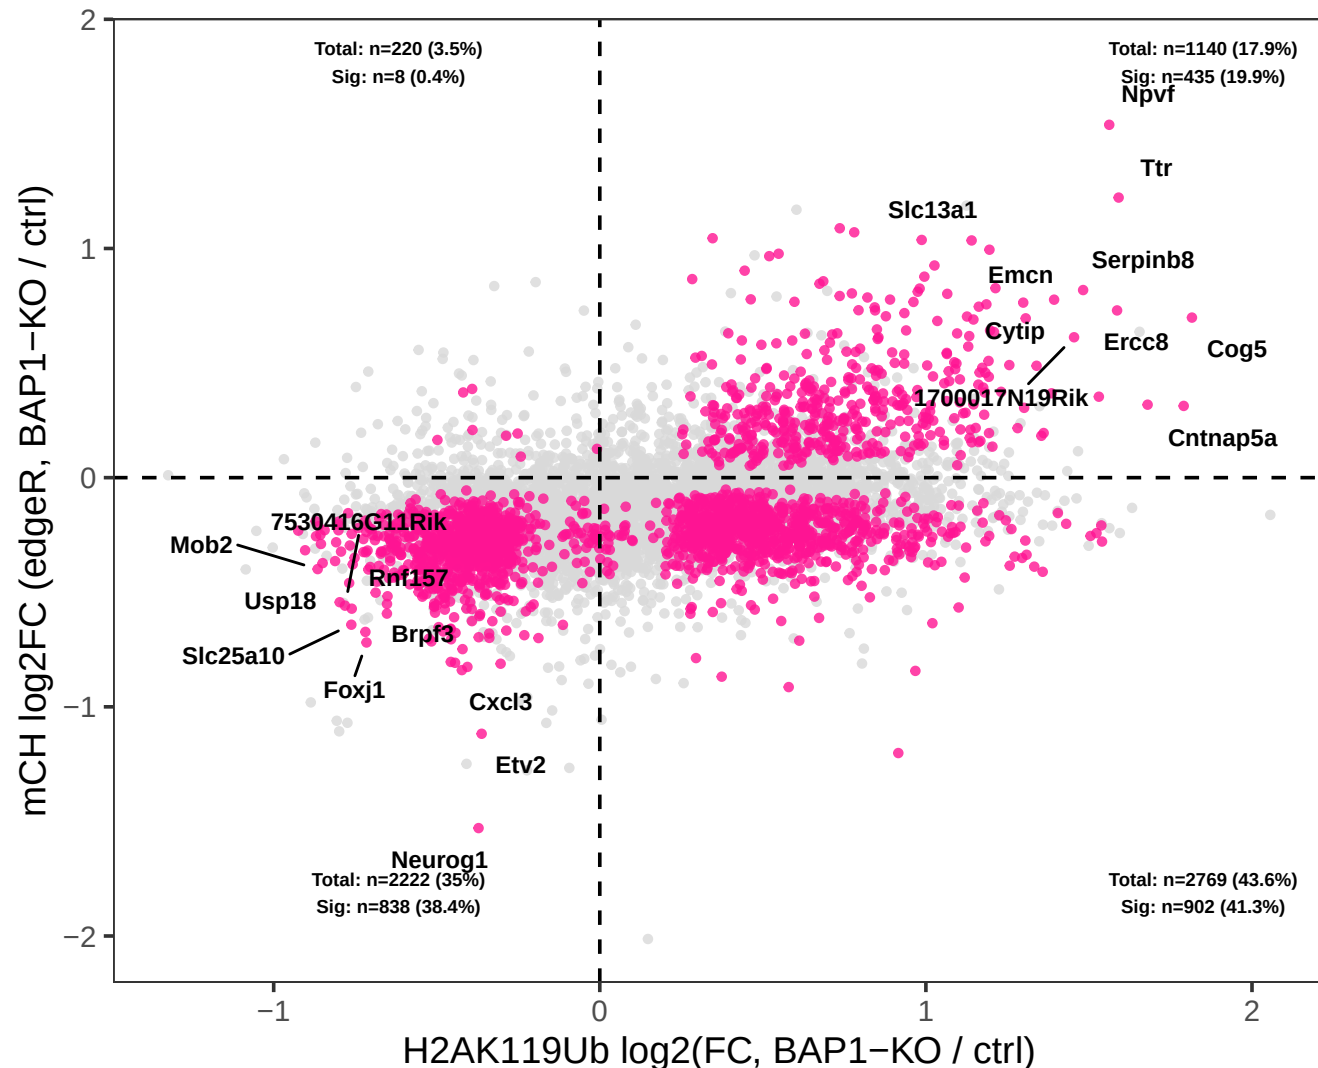

Non-CG methylation vs H2AK119Ub (gene-level)

n (total) = 6351 genes | n (sig in both) = 2183 genes

Spearman rho = 0.37 | p = <1e-10

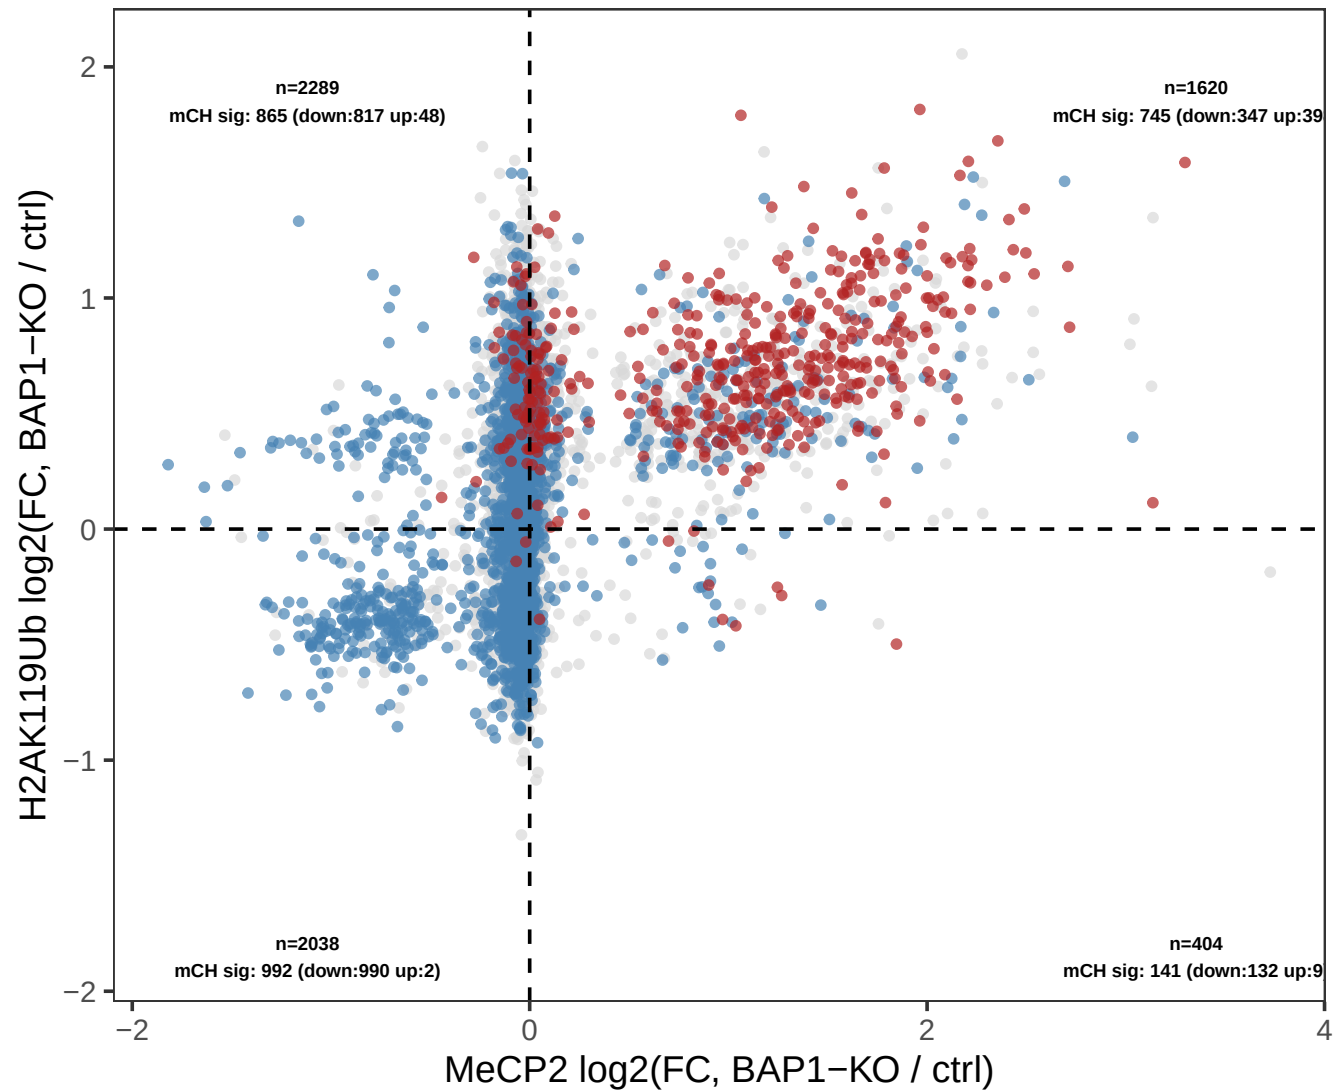

● Not significant ● Significant

MeCP2 vs H2AK119Ub colored by mCH status

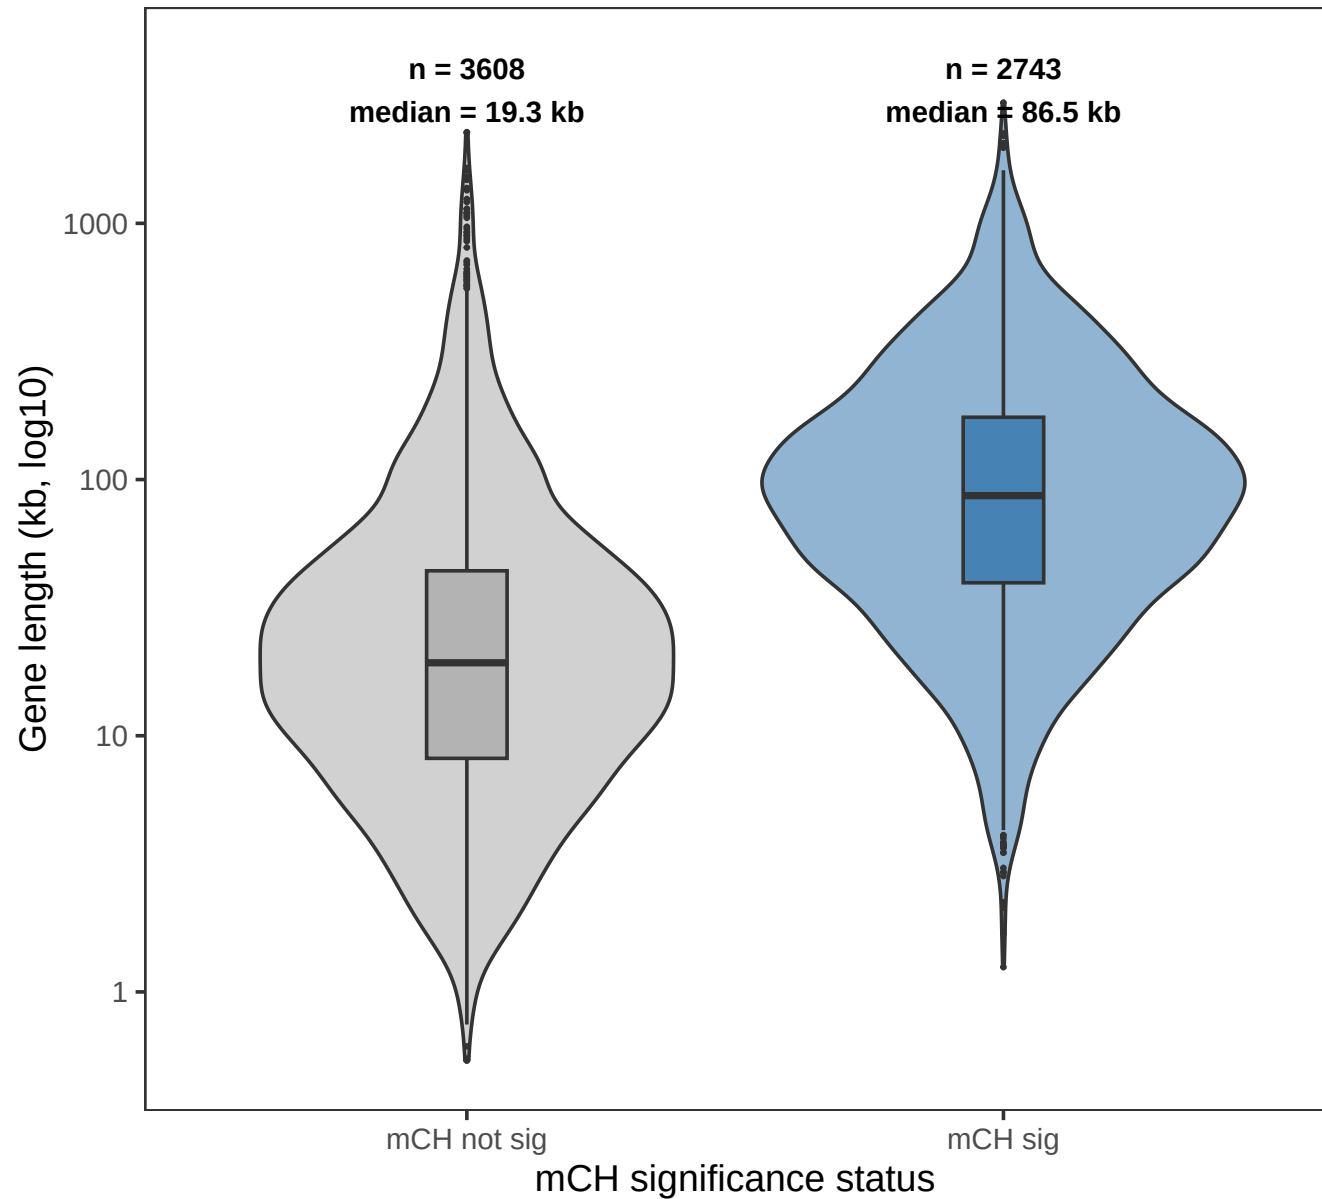

n (total) = 6351 genes | mCH sig: 2743 (down: 2286, up: 457)

● mCH not sig ● mCH down ● mCH up

Gene length vs mCH significance

Wilcoxon p = $<2e-16$

Total coverage vs mCH significance

Wilcoxon $p = <2e-16$
