

mCA volcano coloured by gene length

Median length 12.1 kb among significant genes vs 19.5 kb across all tested genes

20371 genes tested. Significance basis: Bonferroni $p < 0.05$ (156 genes). Raw p on the y-axis; horizontal lines mark the corrected cutoffs. Leave-one-out: each gene was refit 8 times, dropping one sample each time. Ringed points retain significance in all 8 refits.
